

Exploration Manager

PADDINGTON OPERATIONS - KALGOORLIE

The Exploration Manager is responsible for the project development of a portfolio of 'exploration' tenements. The Exploration Manager will grow this tenement package and add value by identifying new opportunities for resource development, and by generating and progressing conceptual targets with longer term resource potential. The primary aim will be to feed Paddington's long term Life of Mine plan (plus 5 - 10 years and outward). The Exploration Manager will also monitor and review external projects within the region with a view towards project acquisition.

The work scope will include:

- Development of a safe working culture within the exploration team
- Geological data review, interpretation and target generation studies
- Cost effective geological programming to test high quality geological targets
- Ensuring that geological data collection and geological reporting is maintained to best practice
- Reviewing the operational Life of Mine plan, and developing, prioritising and implementing exploration programs based on extending that strategy
- Managing land tenure and all statutory reporting requirements and obligations
- Ensuring best practice Native Title processes
- Develop, train and mentor a high performing exploration team
- Liaising with other key management at site

Benefits working with Norton at their Paddington Operations:

- Residential Kalgoorlie / Boulder or; FIFO from Perth
- Competitive remuneration and incentives
- Optional TPD and Health Insurances

Working in a great team environment, this is an exciting opportunity for the right candidate.
