

Senior Underground Mine Geologist

PADDINGTON OPERATIONS - KALGOORLIE

Roster: 5 day / 2 off

The role of the Senior Underground Mine Geologist is to undertake production duties to facilitate the optimal production of gold ore from the underground mining operations. This includes managing the underground geological team to ensure the accurate sampling, mapping, interpretation, communication and documentation of geological, mining and geotechnical data in the mine environment.

The key criteria for this role are:

- Management & mentoring of Underground Geologists, Field staff & contractors to ensure that the geological function is working at full capacity
- Maintaining the standards of geological data collection processes and reporting to JORC 2004 guidelines
- Ensuring that geological interpretations are constantly reviewed & updated with current geological understanding
- Ensuring that Resource models and estimations are completed on a regular basis for both internal and public reporting
- Liaising with other key management at site

Benefits working with Norton at their Paddington Operations:

- Residential Kalgoorlie / Boulder
- Competitive remuneration and incentives
- Optional TPD and Health Insurances
- Relocation assistance available (if required)

Working in a great team environment, this is an exciting opportunity for the right candidate.
